

Mohammad Salman

.NET Developer

I am a skilled Full Stack .NET Developer with a strong background in building scalable, efficient, and user-friendly web and desktop applications. Proficient in C#, ASP.NET, Blazor, and SQL Server, I specialize in creating dynamic front-end interfaces and robust back-end systems. With hands-on experience in integrating third-party APIs, developing custom solutions, and optimizing performance, I bring a comprehensive approach to software development. Passionate about leveraging technology to solve real-world problems, I thrive in collaborative environments and am dedicated to delivering high-quality results that exceed client expectations.

WORK EXPERIENCE

Software Engineer

The Web Gateway

10/2021 - Present

Remote

Achievements/Tasks

- Develop both front-end and back-end components of applications.
- Utilize various .NET technologies and libraries, such as ASP.NET, MVC, Web API, and Entity Framework
- Ensure data security and integrity within applications.

.NET Developer

ZN Productions

12/2020 - 09/2021

Karachi

Achievements/Tasks

- Write clean, efficient, and well-documented code in languages such as C#.
- Develop both front-end and back-end components of applications.
- Work with databases, including SQL Server, MySQL, or NoSQL databases.

.NET Developer

EaseIT Pakistan

06/2019 - 12/2020

Karachi

Achievements/Tasks

- Collaborate with senior developers to develop and maintain software solutions.
- Work on front-end and/or back-end development based on project requirements.
- Participate in problem-solving activities, including root cause analysis.

.NET Intern

Deez International

02/2018 - 05/2018

Karachi

Achievements/Tasks

- Assist in designing, coding, testing, and debugging software applications using .NET technologies.
- Troubleshoot and resolve software defects and issues.
- Gain proficiency in using .NET framework and related technologies (C#, ASP.NET, MVC, Web API, etc.).

SKILLS

ASP.NET

.NET Core

Blazor Server

Blazor WebAssembly

C#

Web Application Development

Desktop App Development

Microservices

SQL Server

Azure

DevOps

CI/CD

SQL Server

Maria DB

Cosmos DB

MySQL

Background Service

WebAPI

Swagger

PERSONAL PROJECTS

PHENOMENEX (03/2022 - 12/2022)

- I developed a global delivery management system for Phenomenex, a leading pharmaceutical company specializing in medical supplies. The system, built using Blazor for the front-end and .NET API for the back-end, enables seamless tracking and management of medical deliveries across the globe. The architecture is based on microservices to ensure scalability, flexibility, and maintainability. Deployment and continuous integration were streamlined using Azure and Azure DevOps.

Tarant County College (01/2023 - 06/2024)

- Contributed to the planning and implementation of a comprehensive Enterprise Resource Planning (ERP) system for Tarant County College, optimizing administrative processes, enhancing academic management, and improving data integration. Collaborated on customization, testing, and user training phases, supporting the successful deployment of the ERP solution.
